Cavitation cellulite
User & Training Manual
CAVITATION Safety Guidelines

The following information is provided for the correct utilization of IPL Skin treatment system. The Information includes not only the accident protection regulations the products comply with, but also the effective prearling proper use of the products.

1) Electric safety regulation

2) Material ROHS test2002/95/EC
Restriction of use of certain Hazardous Substance in Electrical & electronics Equipment/ROHS.

4) ISO13485:2003 MEDICAL
CAVITATION Safety Guidelines

What is CAV?
HKS776B cavitation that revolutionizes the treatment against cellulites and fat. It is a non invasive based on sound waves which generates empty micro bubbles in the liquid situated in the interior of the adipose tissue. Its repeated action causes the accumulation of these micro bubbles, with each other to implode and collapse. The result is the destruction of the adipose cells transforming the fat nodules in liquid substances that in a natural way the body removes through the lymph.

What areas can be treated with CAV systems?
Belly, waist, thigh, calf, buttocks.

What areas forbid treated with CAV systems?
The CAV is a deep model ultrasonic, forbid use around eyes and heart.

What do CAV treatments feel like?
When CAV 40K work, can hear zizizi voice like hexapod sound. body can feel warm and little vibrate.

How many treatments will I need?
3 times in frist week, 2 times in second/third week. after that 1 times per week until satisfying effect.
1. Product Information

APPLICATION
* Localized fat
* Cellulite
* Body sculpture
* Body Remodelling

FEATURE

* 2 Probe
  Deep Probe: 25KHz
  Middle Probe: 40KHz with photon

* Energy: 3-6W/cm² can adjust
* Voltage: 110V or 220V
* Power: 60W
* Frequency: 25K+40KHz
* Active Surface: 18.6cm²
* Operate timer: 1-20min
* Display: 8.0inch touch screen
* Emission model: Scan 2% compared with Frequency
* Funcionality pressure: 500mbar-1060mbar
* Certifications: CE LVD, CE EMC
* Package size: 42*35*22 cm
* G.W: 7.5kg
2. Installation Alignment and operation procedures

2.1 Open the Package and checking, fix the probe holder in back of device.

2.2 Connect the cable to electric, then turn on the Main Switch.
3. Operate the Device

3.1 Operate interface
3. Operate the Device

3.2 Auto Model Treatment

Choice one Treatment Part that you want, then Press OFF Button be ON, The Device start to work.

4. Treatment Procedure

4.1 Let the patient Drink 50-80ML Water before treatment. Then make 5minutes massage, let the cellulite be relax.

4.2 Choice the fat area in body that you want make treatment.

4.3 Put the GEL in this area. the GEL Thickness is around 3-5mm.
4. Treatment Procedure

4.4 Touch the Probe to Skin and move by slowly. Let the treatment probe touch the target area and move (or slide) from the inner to the outer and round and round and from the lower place to the higher, do it in this way by reiterative, when you do the treatment on the upper lid, please move a bit more quickly, when the gel on the skin get drier, please add some GEL and go on with the treatment. The ultrasonic GEL thickness is around 3-5mm.
5. Cavitation Treatment General Knowledge

5.1. Curative effect
After first one or two treatments, the Cellulite will lose 2-3kg. The skin will become lifted.
After one course of treatment; Skin becomes compact and flabby skin is improved. The Cellulite will lose 5-10kg.

5.2. Treatment Caution And the principle for treatment is that the patient should feel warm but not very hot. Keep the skin be wet, put more gel or spray more water. Do not apply on areas such as around the face and heart.

5.3. Taboos
a. To avoid using the machine on the abdomen of the pregnant women or women in menses
b. To avoid using the machine on around the parts under which metal, plastic or silicon were buried.
c. To avoid using the machine on around the medical and electric instrument, such as the hearing aid, heart starter, mechanical heart, etc.
d. To avoid using the machine on the epileptic and those in bad health

To avoid using the machine on the wound around the treatment area and the areas with metals inside of the body.
e. To avoid using the machine on people who has high blood pressure or diabetes or serious skin diseases or heart diseases, or who is sensitive to electric current, or who is receiving hormone treatment.
6. Our Cavitation Device superiority

6.2. Variable frequencies depending on the chosen treatment.

6.3. Frequency of steady emission.

6.4. It does not present any contagious risk.

6.5. Maximum security for the client, default programs

6.6. Permits to adapt the used power used according to the zone and deepness to work.
